

## Thanks for purchase

### **Who's seen a big win in the Casino?**

My best experience is winning \$ 1000 on roulette. About 2 years ago I saw an Asian woman along with her two daughters win \$6,000,00 at M. Resort. All of them were getting pictures with cash fanned out all around.

**So what is a secret of playing online casino games.**

**You should quite be excited to learn how to play online roulette game?**

## HOW TO WIN BIG IN **ONLINE CASINOS**

- Pick an online casino to play online slots from given options:
  - SkyKings

- [32Vegas](#)

- Prestige Casino

- EuroGrand

- Make an account with MoneyBookers or something similar now you can cash out and deposit your online casino games earnings through this method and then get paid directly into your bank account.
- All casinos have an online chat so after signing for account ask online operator via live chat that you are not interested in accepting bonus you will receive when you make deposit. This reality is not explained by many casino sites.
- Because if you accept their bonus then you are compelled to accept their terms and conditions. Better when you do not accept you are free to play casino games as per your wish. now you can play online roulette and cash out your earnings when you want to leave.

Example: If you deposit 10 USD, you can play on roulette and cash out when your earnings rise to any value for eg. 20 USD. ....you make earning of 10 USD. However if you accept their bonus then according to their conditions you will cash out only when your earnings reach 20 times your deposit.

Eg. If the deposited value is 10 USD then cash out after threshold value 20 times i.e 200 USD. (many casino sites fail to tell this fact )

**REMEMBER : DON'T ACCEPT THEIR BONUS**

## **Use the Martingale system on roulette now**

The Martingale betting system increases your chances of winning in the short term: **Increase your odds of winning from 46% to 82%**

### **What is the Martingale?**

**The Martingale is one of the oldest betting systems around.**

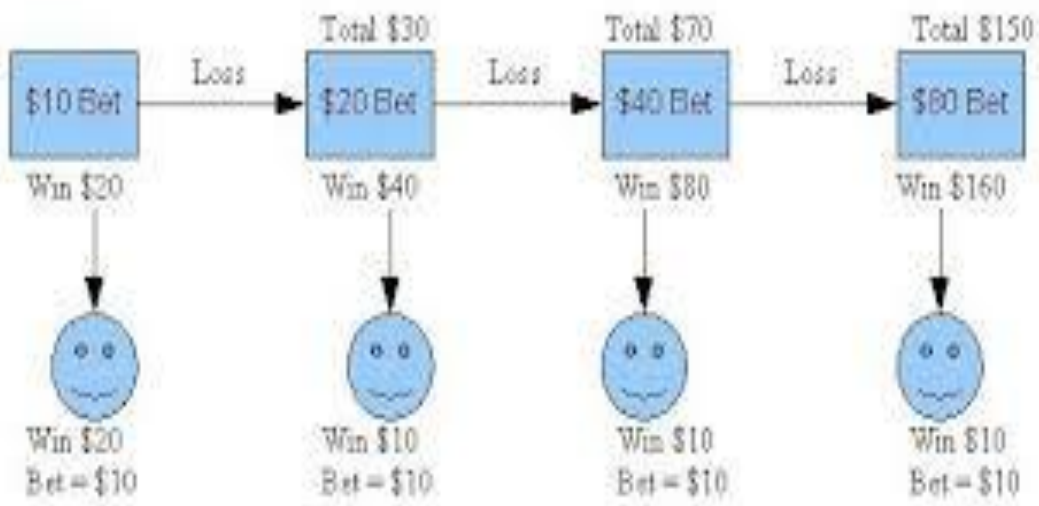

**Here's an example:** You bet \$5. You win, so you bet \$5 again. Then you lose, so you bet \$10. You lose again, so you bet \$20. You lose again, so you bet \$40. You lose again, so you bet \$80. Man, Don't worry you certainly have a chance to win. Your net win on that series was \$5, and since you won \$5 before your losing streak, now you're ahead a total of \$10.

**Well, the shorter the better, but an hour is about right.**

### **How to Use Martingale system on roulette ?**

- Select a color to bet on, red or black. Stick to this color for the entire roulette session.
- Bet the lowest denomination on the chosen color. For example, a dollar.
- If the chosen color lands, the player has won back the amount bet plus one dollar, and the Martingale process starts again with a lowest denomination bet.
- If the chosen color does not land, double the initial bet. For example, if the last bet was for a dollar, the new bet is for 2 dollars.
- If the chosen color does not land again, double the bet again. For instance, if the last bet made was for 2 dollars, now bet 4 dollars.
- Continue doubling the bet each time the chosen color does not win. Statistically, the chosen color has to eventually win. By doubling the bet each time, the player will recoup the amount already lost, plus the value of the initial bet, in this case, a dollar.
- Once the chosen color wins, the Martingale process begins again, with a lowest denomination bet on the chosen color.

Martingale System Overview

Example will further explain the technique

Suppose we have total money **\$500**.

Select a color to bet on **red**. Stick to this color for the entire roulette session. we bet **\$12** on **red** and **hit spin**.

If it landed on **35** which is black so we lose the bet so now onwards use the technique. We lose **\$12** so current amount we have is **\$500 - \$12 = \$488**

We double the bet on red means our new bet amount is **\$24**.

Second chance again it landed on another black say **28** so again we lose the bet but don't worry we have safe technique to win game back finally the ball will be in our court .

So currently we have amount i.e  $\$488 - \$24 = \$464$

Now again double the bet and amount is **\$48**

Now this time it's landed on **34** i.e red colour and finally we win the bet our current amount is  $\$464 + \$48 = \$512$  . we started with **\$500** and cash out **\$512** so net profit is **\$12** in very short time.

**BEWARE : DON'T ACCEPT THE BONUS.** otherwise this won't work. Be smart and use this technique

**Cash out more and more money on regular basis using this simple technique and have fun with earnings.**

## **SHORT SUMMARY**

### **HOW TO WIN BIG IN ONLINE CASINOS**

1. Make an account with [MoneyBookers](#) or something similar so that you can cash out and deposit your casino earnings through this method and then get paid directly into your bank account.
2. Pick an online casino. [Eg, SkyKings, 32Vegas, EuroGrand, Prestige Casino](#)
3. After signing up to an account ask one of the online operators via the live chat to turn off your bonus that you will receive when you make a deposit. (All casinos have an online chat). This is what every other site about casinos fails to teach you. If you accept the bonus, you will have to abide by their terms & conditions. However, if you do not accept the bonus offer then you are free to play however you like. Eg, You can cash out whenever you like and not wait to reach a wagering requirement and you can play on roulette and still cash out your earnings. So if you deposit 20 GBP, you can play on roulette for a bit and then cash out after 30GBP... you will have made 10 GBP in your pocket. But, if you accepted the bonus, you will never be able to cash out after this amount, you will have to do roughly 20 times your deposit. Eg, Deposit 20 pounds and then cash out after 4,000 GBP. (Every other site selling casino info will never ever tell you this).
4. Use the [Martingale system on roulette now](#). Lets say you deposited 40 GBP. You can use the Martingale system method and make money. Eg, 100 GBP. You can now cash out without any wagering requirements.

**Cash out more and more money on regular basis using this simple technique and have fun with your earnings.**

I hope you have enjoyed this simple journey of playing online casinos with us.so now get back to work and pleasure and make tons of money.

GOOD LUCK !
